

Professional level
water purification

BLUEWATER PRO
THE POWERHOUSE PERFORMER

BLUEWATER PRO POWERHOUSE WATER PURIFICATION FOR PRISTINE WATER ON DEMAND

Functional and convenient
The Bluewater Pro can be installed to work with most home appliances.

Compact and robust, Bluewater Pro is a powerhouse point-of-use water purifier that helps professional kitchens create their own nearly endless supply of pure water for cooking, washing and drinking.

A sound investment

Delivering up to an amazing 76 gallons per hour / 287 liters per hour* (Pro 400C-HF), Bluewater Pro removes waterborne contaminants. One of the best image-boosting investments you can make in the health and wellness of your customers, Bluewater Pro removes unhealthy chemical contaminants, heavy metals, and pathogenic bacteria from your tap water.

Superior second-generation reverse osmosis

The harnessing patented second-generation reverse osmosis technology called SuperiorOsmosis™, Bluewater Pro turns municipal water into pristine water for drinking, cooking and washing. You can connect the Bluewater Pro to the ice maker to get pure ice cubes and to the dishwasher to ensure sparkling glassware and dishes.

Easy to install. Easy to maintain.

Any competent plumber can easily install Bluewater Pro. Pre-fitted water connectors and an electric cable on the back of the unit make it easy to connect the water purifier correctly to the water inlet and outlet system and the power source.

A new dimension in water purification

The Bluewater Pro delivers a new dimension to generating cleaner, healthier water in commercial environments by improving the entire drinking experience, from tabletop water served to diners to serving great-tasting water mocktails in the bar. Bluewater Pro not only means you get your own source of on-demand pristine drinking water, but also ensures you can forget about buying bottled water altogether.

*WQA results: 76 gallons per hour (287 liters per hour) based on WQA test parameters.

SuperiorOsmosis
Patented SuperiorOsmosis™ for powerhouse delivery of clean water from the tap with more than 60% reduction in waste water compared to traditional reverse osmosis solutions.

Superior flow
Benefit from a market leading high flow of water from the tap, delivering 76 gallons per hour / 287 liters per hour* (Pro 400C-HF).

Contaminate removal
95-99% removal of most water-borne contaminants that can threaten health or taste such as lead, copper, cysts and nitrates.

Recovery
An amazing 50-60% recovery rate reduces waste significantly, and helps reduce environmental impact.

Long life membrane
Our patented design dramatically extends the life of the membrane filter beyond all competing products.

Brackish water
The Bluewater Pro B model can purify brackish water up to an astounding 7500 ppm.

Great for cooking
The Bluewater Pro removes most of the impurities that can impact food quality.

Beautiful design
The Bluewater Pro is designed to fit into the style of your kitchen.

Tankless direct flow

Water is purified directly on demand and no tank is necessary.

Inlet low feed pressure switch

Automatically turns off unit in case of water pressure loss.

Filter monitor

Monitors and alerts you when filters need to be replaced.

Leak detection and shutoff switch

Detects leaks and shuts off unit automatically.

Purified water quality monitor

Monitors quality of water and alerts you when quality is low.

Membrane flush valve

Performs periodic flush of filter membrane to maintain optimal flow rate and filter life.

Fully enclosed

Sleek and stylish – looks as great as it works.

Models available

- Bluewater Pro 400C – high flow membrane.
- Bluewater Pro 400CV – high rejection membrane with pure water flush valve for ultimate purification.
- Bluewater Pro 400B – filters brackish water up to 7500 PPM (parts per million).

Product dimensions

8.9 x 18.7 x 18.3 inches (WxDxH)

Our purification process

1. Unfiltered water enters the Bluewater Pro via the inlet water.
2. Larger contaminants are removed using a high-quality 5µ sediment filter and Bluewater activated carbon pre-filter.
3. Bluewater's superior membrane removes the tiniest contaminants down to 0.0001 micron in size (that is 400 times smaller than the smallest virus).
4. Bluewater's patented SuperiorOsmosis™ circulation technology continuously cleans the membrane, ensuring higher flow, better purification, less waste water and longer membrane lifetime.
5. Harmful contaminants are flushed out with the outlet water.
6. The Bluewater Pro delivers crystal clean, healthier and great tasting drinking water directly out of your tap.

GOOD FOR YOU
GOOD FOR HUMANITY
GOOD FOR THE PLANET

Bluewater harnesses patented technology to deliver enhanced water quality in a world where tap water taste and safety can no longer be taken for granted. We believe everyone has the right to drink water that is as clean as nature intended. That is why our technology is designed to deliver water for residential and commercial drinking, cooking, washing and other purposes that is free of bacteria, toxic metals, pharmaceutical and chemical residues, and the likes of limescale.
