

## Bluewater Water Stations

# PURIFIED DRINKING WATER, LOCALLY SOURCED AND DISPENSED ON DEMAND

A Bluewater Water Station turns locally sourced water into pure, delicious drinking water, served chilled or carbonated on demand, for use at your venue or event. Offered together with Bluewater’s refillable bottles, you can raise the sustainability profile of your venue, meeting or event. And do good for the planet by getting rid of harmful single-use plastic bottles and packaging, and the costs associated with clean-up and disposal.

### KEY BENEFITS

- High volumes of purified drinking water delivered onsite
- Higher purification efficiency, longer service life and less wastewater than traditional RO systems
- Versatile, modular system adapts to event requirements
- Sustainable reusable bottles reduce plastic waste, clean-up and disposal costs
- Enhanced sustainability profile – safer drinking water and minimized carbon footprint

### ADVANCED WATER PURIFICATION TECHNOLOGY

Patented next-generation Superior-Osmosis™ technology efficiently removes up to 99.7% of all contaminants found in water, such as chemicals, toxins, heavy metals and bacteria.

### REUSABLE, REFILLABLE BOTTLES

Bluewater stainless-steel bottles can be co-branded with your logo and either generate new sources of revenue or serve as a corporate give-away.

### EVENT SUPPORT AND SERVICE

Bluewater provides support and service every step of the way—from installation to a Bluewater solution tailored to your event requirements.

Bluewater innovates, manufactures and commercializes compact water purifiers for residential, business and public use. Using patented next-generation reverse osmosis technology, Bluewater water purifiers remove virtually all pollutants, including limescale, chemicals, microplastics and toxic metals, from your water. Bluewater endorses the UN Environment Clean Seas initiative to turn the tide on plastics.
